The bill would require the CIWMB, for every pound of postconsumer material purchased from a source of postconsumer material for use in the manufacture of plastic trash bags, to credit the manufacturer so certifying with having used 1.2 pounds of postconsumer material toward compliance with the certification requirements. The bill would require the CIWMB to submit a report to the Legislature by April 1, 2000, on, among other things, recommendations regarding recycled plastic postconsumer material content requirements based on the availability of that material. Bill No: **SB 1066 (Sher) Sponsors: City of San Jose, League of California Cities and Californians Against Waste**

Subject: **Solid Waste: Market Development**

Intro: Authorizes the CIWMB to grant single or multiyear extensions to achieve the goals of the Integrated Waste Management Act (Chapter 1095, Statutes of 1989). The bill requires the CIWMB to consider specified circumstances in deciding whether to grant an alternative source reduction, recycling, and composting requirement. It requires the Market Development Plan developed by the CIWMB to include efforts to encourage and promote cooperative, regional programs to expand markets for recycled materials, and include activities to address problems and opportunities that are unique to rural, urban, and suburban areas of the State. SB 1066 requires the CIWMB to develop a plan to provide assistance to local agencies in the implementation of cost-effective programs that provide a quality supply of recycled materials for markets. The bill authorizes the CIWMB to develop a program to increase the use of compost products in agricultural applications. It requires the CIWMB, the TCA, and the Treasurer to coordinate activities that will leverage financing for market development projects and encourage joint activities to strengthen markets for recycled materials. SB 1066 requires the CIWMB to assist market development efforts by local agencies and the private sector, to use data resources collected from recycling, composting and disposal activities, or from other sources, and to provide periodic information on the recovery and availability of recycled materials. Finally, the bill requires the CIWMB, by September 1, 1998, to submit a report to the Governor and the Legislature that details specified matters regarding regulations and procedures concerning recycling by State agencies.

Vetoed Bills

Bill No: AB 84 (Woods) *Sponsor: California Rice Industry Association & Rice Producers Association*
Subject: State Contracts: Recycled Products Preferences
Intro: Would have required State agencies to give a price preference, not to exceed 10 percent, to products manufactured with rice straw. Additionally, the bill would have required the CIWMB
12/23/96 to implement this price preference program by July 1, 1998. The CIWMB could not expend
Amended: 6/24/97 more than \$110,000 from the Integrated Waste Management Fund to implement this program, of which no more than \$10,000 is allowed for administrative costs for the program. This program would have become inoperative on the date that the CIWMB has expended \$100,000 for funding claims. Additionally, AB 84 would have required the DGS to require the persons with whom they contract to use, to the maximum extent economically feasible in the performance of the contract work, these products.
Status: Vetoed by the Governor on 10/10/97.
Veto In his veto message, the Governor stated that, "...While the intent of the bill may have merit,
Message: I am concerned that the bill may be premature. Last year, I signed AB 3345 (Chapter 991, 1996) which requires the Waste Board to complete a study on uses of agricultural wastes, including rice straw, by January 1, 2000. I believe that any new program involving the use of agricultural wastes should await completion of that study. In addition, there appears to be no basis to elevate rice straw products to a higher status for price preferences, as past price preferences claims programs have not been successful. Further, the bill would result in a significant unfunded cost to the Waste Board which would adversely impact existing high-priority programs such as permitting, enforcement and education."

Bill No: AB 179 (Bowen) *Sponsor: Author*
Subject: Public Records
Intro: Would have provided for public inspection of public records and copying in all forms, and
1/30/97 would have specified that electronic access to identifiable public records shall not be
Amended: 9/9/97 construed to permit public access to records held by the DMV or the CHP. The bill would have expressly stated that an elected member or officer of any State or local agency is entitled to access to public records of that agency on the same basis as any other person. The bill would have limited the authorization to apply for judicial relief under the California Public Records Act to persons who submitted a written request for a public record and that request was denied or the agency to which the request was directed has failed to respond in a timely manner.
Status: Vetoed by the Governor on 10/12/97.
Veto In his veto message, the Governor stated that, "...This bill creates a new inflexible mandate
Message: by requiring the agency to provide the electronic data in the form requested, unless it is "unreasonable" to do so, without ever defining the breadth of that exemption, thereby leaving it open to litigation. A request that an electronic record is provided in a particular form may require additional expense, burden, and time to segregate the public data from the exempt data, but the bill provides no guidance whether or to what extent that additional burden makes it "unreasonable."

Additionally the Governor stated, "...Agencies should make available to the public all documents to which public access is granted. But we need not add costs and rigidity to these obligations by specifying the form in which it will be done."

Bill No: AB 705 (Strom-Martin) **Sponsor:** Californians Against Waste
Subject: State Recycling
Intro: Would have required, upon the request of a local agency, that any State agency declare to what extent it intends to utilize programs or facilities established by the local agency for the handling, diversion, and disposal of solid waste. If the State agency did not intend to utilize those established programs or facilities the bill would have required the State agency to identify sufficient disposal capacity for waste that is not source reduced, recycled, or composted. Additionally, AB 705 would have reenacted provisions of law that required all State agencies to purchase certain recycled products if they meet quality and cost considerations. The bill would have included building and construction materials, outdoor furniture, and landscaping materials within the definition of recycled products for purposes of procurement requirements for State agencies.
2/26/97
Amended: 9/5/97
Status: Vetoed by the Governor on 10/4/97.
Veto In his veto message, the Governor stated that, "...this bill states that upon the request of the local agency, any State agency shall declare to what extent it intends to utilize programs or facilities established by the local agency for the disposal of solid waste. If the State agency declines to utilize the locally established program or facility, it is required to identify sufficient disposal capacity for its resulting waste. Although this immediately follows the intent language about State and local agencies working together, this section provides nearly unlimited authority for local agencies to require a State agency to respond to this burdensome request. As written, the provision is broad, undefined in critical areas, and displays a lack of respect for the overall sovereignty of State agencies and a lack of understanding of State agency operations and of relevant codes and regulations."
Message:

Bill No: AB 1055 (Villaraigosa) **Sponsor:** Author
Subject: Playground Equipment and Facilities: Grant Program: Safety: Recycled Materials
Intro: Would have enacted the Playground Safety and Recycling Act of 1997. The Act would have established, until July 1, 2001, the playground safety and recycling grant program administered by SDE, in consultation with DHS. The purpose of AB 1055 was to provide grants to local agencies to upgrade and improve local playgrounds. Additionally, the bill would have provided as a condition for a local agency to be eligible for grant funds, that funds would be used for the improvement or replacement of playground equipment or facilities through the use of recycled materials. Urgency Measure.
2/27/97
Amended: 9/9/97
Status: Vetoed by the Governor on 10/12/97.
Veto In his veto message, the Governor stated that, "...A State-funded grant program is unnecessary. Playground facilities are an integral plan of the school infrastructure. Any installation, upgrades, repairs, or replacements may be done in the course of regular operations, based upon the individual school's priorities, and utilizing funding already provided through a variety of sources."
Message:

Bill No: AB 1157 (Wayne) **Sponsor:** Author
Subject: Hazardous Waste: Variance
Intro: Would have required the DTSC to issue a public notice not less than 30 days immediately preceding the date of the proposed granting of the hazardous waste variance, unless the issuance of the variance was immediately required to protect human health or the environment.
2/28/97
Amended: 7/18/97
Status: Vetoed by the Governor on 9/21/97.
Veto In his veto message, the Governor stated that, "...enactment of AB 1157 would increase costs for businesses by unnecessarily impeding business operations for an additional 30 days, without providing any demonstrated level of health and safety benefits beyond the existing requirements."

Bill No: **AB 1293 (Bowen) Sponsor: Author**
Subject: **Geographic Information Systems**
Intro: Would have enacted the Strategic Geographic Information Investment Act of 1997. It would
2/28/97 have required the Resources Agency to establish a Geographic Information Systems Panel
Amended: (GISP) responsible for implementing a grant program and the Geographic Information Grant
9/5/97 Fund (GIGF) to serve as an alternative source of funds for public agencies to create and
maintain geographic information data bases.
Status: Vetoed by the Governor on 10/10/97.
Veto In his veto message, the Governor stated that, "...Among other concerns, it is counter-
Message: intuitive to create an advisory panel with seven or more members, pay their travel and per
diem and call the action government efficiency. This is particularly true when most of the
goals of this program are achievable under existing law. In short, this bill is unnecessary and
creates an infrastructure to accomplish what can be done in its absence."

Bill No: **SB 74 (Kopp) Sponsor: California Newspaper Publishers Association**
Subject: **Records**
Intro: Would have provided for public inspection of public records and copying of all forms, as
12/12/96 specified. The bill would have clarified that nothing shall limit the ability of elected members
Amended: or officers of any State or local agency to access public records permitted by law in the
8/11/97 administration of their duties.
Status: Vetoed by the Governor on 9/12/97.
Veto In his veto message, the Governor stated that, "...This bill creates a new inflexible mandate
Message: by requiring the agency to provide the electronic data in the form requested, unless it is
"unreasonable" to do so, without ever defining the breadth of that exemption, thereby
leaving it open to litigation. A request that an electronic record is provided in a particular
form may require additional expense, burden, and time to segregate the public data from the

Bill No: **SB 451 (Watson) Sponsor: California State Bar**
Subject: **Land Use: General Plans: Environmental Equity**
Intro: Would have required the local governments' general plans to provide for the general location
2/19/97 of commercial and industrial land uses that are regulated because of handling of hazardous
Amended: materials to avoid concentrating these uses in close proximity to schools or residential
8/27/97 communities and to provide for the fair treatment of people, regardless of race, culture or
income level.
Status: Vetoed by the Governor on 9/28/97.
Veto In his veto message, the Governor stated that, "...The process to site and develop a solid
Message: and/or hazardous waste facility is an intensive exercise in environmental documentation,
geographical consideration, public hearings, and State and local permitting procedures. The
law presently contains an abundance of planning requirements, including provision of
extensive public hearings to address environmental and other land use planning concerns
that include and exceed those contained in this bill. Specifically, regular periodic amendment
of local community general plans is required by law to be made in compliance with the
extensive projects of CEQA. This bill will add nothing of practical value to the present
extensive and rigorous protections and planning requirements demanded by existing law."

Bill No: SB 1113 (Solis) *Sponsor: Author*
Subject: **Environmental Quality: Minority and Low-Income Populations**
Intro: Would have required the Office of Planning and Research, by January 1, 2000, to
2/28/97 recommend changes to the CEQA guidelines to provide for the identification and mitigation
Amended: by public agencies of disproportionately high and adverse environmental effects of projects
7/11/97 on minority populations and low-income populations. The bill would have required the
Secretary of Resources Agency to certify and adopt those recommended changes by
January 1, 2000.
Status: Vetoed by the Governor on 10/4/97.
Veto In his veto message, the Governor stated that, "...The State environmental laws do not
Message: provide separate, less stringent requirements, or lower standards in minority and low-income
communities. Environmental laws are, and should remain, color-blind. The California
Environmental Quality Act was not designed to be used as a tool for a social movement.
The California Environmental Quality Act is a cumbersome process and any changes made
to it should be to streamline the current process, not add new requirements that will only
negatively affect the economy and the people of this State."

Bill No: SB 1179 (Polanco) *Sponsor: Browning and Ferris Industries*
Subject: **Solid Waste Enterprise: Indemnity Obligation: Diversion Penalty**
Intro: Would have restricted the ability of local government to impose monetary penalties on solid
2/28/97 waste enterprises for the enterprises' failure to meet solid waste diversion mandates
Amended: specified in the Integrated Waste Management Act.
8/28/97
Status: Vetoed by the Governor on 10/13/97.
Veto In his veto message, the Governor stated that, "...To assert that solid waste management
Message: enterprises cannot indemnify losses based upon their own breach without the State's
intervention to negotiate the terms of the agreement is ludicrous on its face. Thousands of
contracts incorporate performance provisions that offer incentives or impose specific
damages. These contracts are routinely drafted and enforced without government
intervention.

When government ventures into the arena of contractual negotiations it is generally to protect an obviously disadvantaged party. In this instance it appears that the State is being asked to protect the industry from itself. Indeed there is significant evidence that the industry is responsible for the proliferation of waste diversion indemnification agreements. Various solid waste management providers have offered to indemnify prospective clients to gain an advantage in a competitive marketplace.

The problem contemplated in SB 1179 is prospective in that no solid waste enterprise has ever been asked to indemnify a local governmental agency for waste diversion penalties because no such penalties have ever been imposed. In addition, my recent signing of SB 1066 (Sher), which authorizes waste diversion variances and time extensions, makes it significantly less likely that diversion penalties will be imposed precipitously.

Nonetheless, it's arguable that local government agencies should be precluded from shifting responsibility for their own failure to comply with State law even to a willing solid waste enterprise.

I would accordingly be willing to consider legislation which clearly, concisely and prospectively provides that a solid waste enterprise may not indemnify a governmental agency by obligating itself to pay waste diversion penalties unrelated to its own performance.
